

Social Security

View Your New Benefit Amount Using Your Personal my Social Security Account

Dear Client:

Your *Social Security Statement* is streamlined and easier to read than ever before. That is because we have redesigned the *Statement* to provide you the most useful information up front and at a glance.

We encourage you to check your *Statement* at least once a year to review:

- Your earnings record (to make sure it's accurate and notify us if you see any errors);
- Your personalized monthly retirement benefit estimates (which now display how much you can expect to receive depending on when you decide to start your benefits between ages 62 and 70);
- Other useful information that will explain your benefits and help you prepare for your financial future; and
- New fact sheets that provide additional information based on your specific age group and earnings situation.

You can access your new *Statement* by signing into your account at socialsecurity.gov/reviewyourstatement.

Now that you can access your *Statement* instantly and anytime online, we will not automatically send one by mail.

We hope you find your new *Statement* useful and informative.
